

# Take collaboration to a *whole new level*

by switching to a Cisco Spark phone system.

Makes it simpler.

#### CISCO SPARK

- Cloud-based phone system
- Works on any device
- Easy to use
- Keep your current numbers

#### COLLABORATE ANYTIME

- Meet 'on the fly'
- Continue where you left off
- Screen sharing

#### VIDEO CONFERENCE

- Seamless, private and secure
- Avoid winter driving
- Save money on travel

#### AS A BUSINESS PHONE

- Voice Mail to Email
- Music on hold
- Highly Secure
- Better customer service

With meetings, messaging and calling, it takes collaboration to a whole new level.

Cisco Spark is a cloud-based phone system. With it you can call anyone, whether they have a landline, cellular or other Spark phone.

But Spark does so much more than a regular phone system.

Spark meetings bring people together to create, communicate and collaborate in one continuous workstream—before, during, and after the meeting.

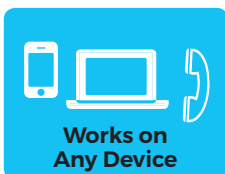

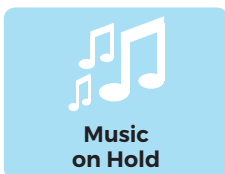

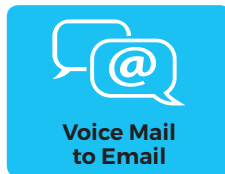

Teams can be more effective. They can work across any mobile or video device. You can invite others to join meetings from their desk, a branch office, at home, or on the road—anywhere, anytime.

Switching over is easy.

*We're RBBS Telecom & Computers.*
